I'm a **Front-End Engineer** with extensive experience in building scalable, maintainable web applications and designing user-centric interfaces. Over the years, I've taken on roles with increasing responsibility, currently serving as a **Staff Front-End Engineer** at **Adevinta Spain**, where I drive convergence across multiple teams and ensure alignment on key technical decisions for front-end development. My focus is on optimizing front-end workflows and ensuring consistent practices across the organization.

In this role, I colead the creation of the **golden path** for front-end development, guiding teams in adopting a unified stack and best practices that foster efficiency and scalability. I facilitate agreements on technology choices, ensuring that teams remain aligned and that technical solutions are cohesive across verticals. Additionally, I prioritize **observability**, ensuring our systems provide clear insights into performance and reliability, while supporting the development of shared tools like the **SUI Components design system** and the **SUI toolkit**.

Work experience

Adevinta Spain

- 📅 MARCH 2019 - PRESENT
Staff Front-End Engineer
 - Facilitating agreements between teams to ensure that all verticals (*Motor*, *Real Estate*, *Jobs*, etc.) adopt and follow the **golden path**.
 - Developing shared tools to optimize front-end workflows.
 - Providing guidance on CI/CD implementation and build time and deployment improvements.
 - Actively involved in key technical decisions, supporting teams in defining their technology roadmaps and solving complex issues.
 - Fostering collaboration and knowledge sharing among different company verticals.
 - Supporting the modernization of the tech stack by providing training and assistance to development teams.
- 📅 FEBRUARY 2016 - FEBRUARY 2019
Senior Front-End Developer
 - Contributed to the transition from a monolithic architecture to a microservices-based system with a layered front-end, improving scalability and code maintainability.
 - Helped to create the **SUI Components design system** and the **SUI toolkit**.
 - Promoted the adoption of new technologies such as **React**, **Node.js**, and **Sass**, enhancing development speed and code quality.
 - Introduced improvements in the development process, including task automation and testing, which accelerated deployment times and optimized workflows.

Ofertia

- 📅 FEBRUARY 2015 - FEBRUARY 2016
Senior Front-End Developer
 - Developed robust front-end solutions, adhering to high-quality standards with a strong focus on testing and performance.
 - Responsible for technical planning and front-end management, ensuring architectural scalability and cohesion.

Softonic

- 📅 AUGUST 2012 - DECEMBER 2014
Lead Front-End Developer
 - Technical responsible for a product quality, stability and sustainability.
 - Building, training and making the team knowledge grow.
 - Analyzing and resolving all levels of technical problems.
 - Team figurehead, providing technical leadership within their team, including coaching and mentoring team members.
 - Quickly identifying and escalating risks and issues to the appropriate person with well defined solutions, while often implementing them.
 - Actively looking for *Scrum* process improvements within the development department and proposing solutions.
 - Also developing as any other member within a team.
- 📅 OCTOBER 2009 - JULY 2012
Front-End Developer / Web Designer
 - Designing, developing and testing software solutions including proposals of the functionality architecture, and modifications to existing functionality.
 - Analyzing and resolving moderately complex technical and business problems.
 - Working with the customer to clarify details of the *User Stories* such as the *User Acceptance Criteria*.
 - Identifying and escalating risks and issues to the appropriate person.
 - Actively looking for Scrum process improvements within the team.
 - Providing estimates for tasks.
 - Demonstrating commitment to continuous professional development.

Freelance

- 📅 MAY 2005 - JULY 2012
Web Designer and Developer
 - Developed web design projects and applications for various clients, from corporate identity to full website development.

Web Experience

- 📅 APRIL 2008 - APRIL 2009
Web Designer

Education

Escuela de Arte y Superior de Diseño de Alicante

- 📅 2003
Título Superior en Diseño Gráfico

Universidad Miguel Hernández de Elche

- 📅 2001
Licenciatura en Bellas Artes
